political world through the lens of a racial identity. Whiteness was once thought to be invisible because of whites' dominant position and ability to claim the mainstream, but today a large portion of whites actively identify with their racial group and support policies and candidates that they view as protecting whites' power and status. In White Identity Politics, Ashley Jardina offers a landmark analysis of emerging patterns of white identity and collective political behavior, drawing on sweeping data. Where past research on whites' racial attitudes emphasized anti-group hostility, Jardina brings into focus the significance of in-group identity and favoritism. White Identity Politics shows that disaffected whites are not just found among the working class; they make up a broad portion of the American public — with profound implications for political behavior and the future of racial conflict in America. The question of how relations between marginalized groups are impacted by their common and sometimes competing search for equal rights has become acutely important. Demographic projections make it easy now to imagine a future majority population of color in the United States. Minority Relations sets forth some of the issues involved in the interplay among members of various racial, ethnic, and sexual minorities. Robert S. Chang initiated the Intergroup Conflict and Cooperation Project and invited historian Greg Robinson to collaborate. The two brought together scholars from different backgrounds and disciplines to engage a set of interrelated questions concerning groups generally considered minorities. This collection strives to stimulate further thinking and writing by social scientists, legal scholars, and policymakers on inter-minority connections. Particularly, scholars test the limits of intergroup cooperation and coalition building. For marginalized groups, coalition building seems to offer a pathway to addressing economic discrimination and reaching some measure of justice with regard to opportunities. The need for coalitions also acknowledges a democratic process in which racialized groups face significant difficulty gaining real political power, despite such legislation as the Voting Rights Act. Francesca Merlan examines the dynamics of difference that have existed between the settler majority and indigenous minority of Australia, from the events of early exploration to the present, shedding light on their unequal and changing relations over time.
